Projects

=> Inventory Management

[live-demo](#) | [server-code](#) | [client-code](#)

Use Technologies : Tailwind, React, Daisyui Nodejs, Expressjs, MongoDB, Axios, React Query, Stripe, Firebase, Vercel .

- Here basically the project is made with different types of cars. Here anyone can buy the car of his choice Here anyone can open a shop and buy and sell by adding their products.
- I have added payment method in this website. Where the user can pay the price of the purchased product and view the details.

=> Library Management System

[live-demo](#) | [server-code](#) | [client-code](#)

Use Technologies : Tailwind, React, Daisyui, Nodejs, Expressjs, MongoDB, Axios, JWT, Firebase, Vercel .

- In this project any student or anyone else can select his/her favourite books to read.
- There is a specific set for returning the books, It can be viewed by the user and the books can be returned.
